APHELION Unveils Dark, Dystopian Rock Re-Imagining of “**TO THE MOON & BACK**” — Arriving May 1st

APHELION returns with a striking new release: a brooding, atmospheric rock cover of the 1996 pop classic originally written and performed by **Savage Garden**. While honoring the emotional core of the original, **APHELION** transforms the track into a shadow-soaked, modern soundscape that feels eerily resonant in today’s world.

Heavy with grit, mood, and cinematic tension, **APHELION**’s “**TO THE MOON & BACK**” amplifies the story of a woman scarred by emotional neglect, shaped by a childhood starved of affection. Hardened by circumstance, she hides behind an icy exterior—even as she silently yearns for a connection powerful enough to break through her defenses. **APHELION**’s reinterpretation leans into this dichotomy, pairing vulnerable lyricism with a darker, dystopian rock edge that mirrors her inner conflict.

The new arrangement elevates themes of alienation, longing, and the hunger for an otherworldly kind of love—one intense enough to pull her out of isolation. **APHELION**’s vocal delivery and production choices give the familiar narrative new life, reframing the song as a haunting anthem for anyone who has ever armored themselves against the world while desperately craving something real.

“TO THE MOON & BACK” arrives May 1st.
